

INFO 5555 ResearchSuite Demo Setup (iOS)

Step 1. Download or clone the ResearchSuite Demo project from this repository:

<https://github.com/ResearchSuite/ResearchSuite-Demo-iOS>

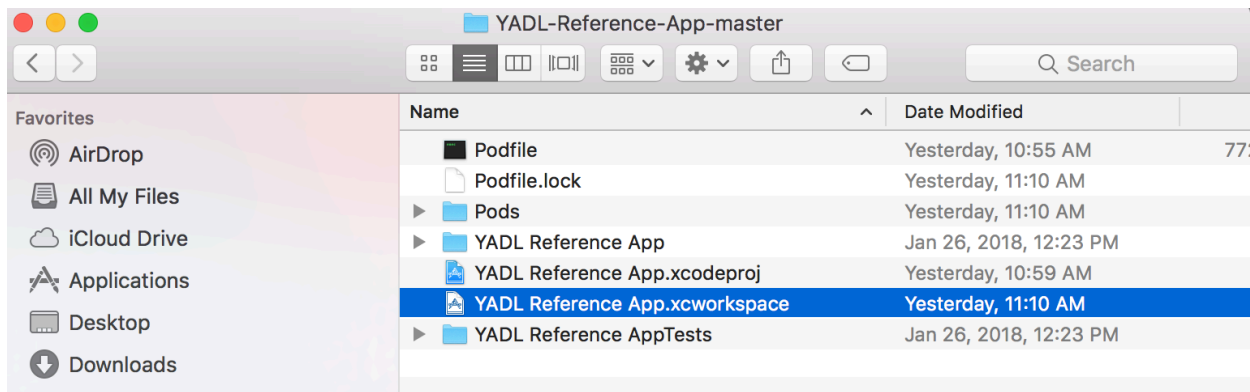

Step 2. Download Xcode from the Mac App Store. If you have never used Xcode before [here](#) is a good basic overview of the Xcode workspace environment.

You will need to use Cocoapods, a dependency manager. The dependencies for a project are specified in a textile called a Podfile.

Step 3. To install cocoapods: **\$ sudo gem install cocoapods**

Step 4. To install the dependencies, cd into the project directory and **\$ pod install**

Step 5. Click on the **.xcworkspace** to open the project

If you run into any issues, contact Christina Tsangouri (ct576@cornell.edu) or Hongyi Wen (hw557@cornell.edu).
